Heritage Series Aluminum Doors

ALUMADOOR

HERITAGE WOODGRAIN DOORS **A Better Door at a Better Price.**

When you buy an AlumaDoor, you're buying quality. Up close or from the curb, the gorgeous, tactile woodgrain texture and prestained finish on every exposed surface ensures a complete sense of wood. The precise fit of real tongue-n-groove panels exudes quality from every angle. The divided-lite windows deliver an unsurpassed classic architectural appeal to any home. And from a design standpoint, AlumaDoor garage doors are engineered to maximize headroom and backroom clearance, optimal for oversized sedans and SUVs.

Enhance your curb appeal with a Heritage Woodgrain Door.

Superior Craftsmanship

AlumaDoor garage doors are built on quality. Wood grain surfaces are stained on all six sides. Panels are built on a ¼-inch tongue-n-groove design. The divided-lite tops glazed with ¼-inch tempered clear glass* enhances the appearance. And the 6063-T6 extruded aluminum alloy frame with integrated internal strut maximizes backroom and headroom clearance.

• Other glass options available.

Benefits of Aluminum

- Lighter
- More durable
- Easier to clean and maintain
- Will not dent, peel, crack or split like stamped steel or natural wood doors
